SAN FRANCISCO SOUND RENTALS

What We Do

Full-Service Sound Equipment Rental & Audio Visual Solutions for the Bay Area

San Francisco Sound Rentals is a locally owned sound equipment rental company built around a simple idea: every event deserves to sound and look as good as it feels. Whether it is a wedding reception in the Marina, a corporate product launch downtown, a community festival in Golden Gate Park, or a private party in the East Bay, we supply the audio visual equipment for events that brings the moment to life — without the stress of figuring out the technical details yourself.

We work with event planners, corporate teams, nonprofit organizations, wedding couples, musicians, and everyday hosts who need dependable gear and a team that actually knows how to use it. Our approach is straightforward: listen to what the event needs, recommend the right equipment package, deliver it on time, and make sure it performs flawlessly from the first toast to the last song.

This page walks through exactly what we offer, how our rental process works, and why clients across San Francisco keep coming back to us for their sound and AV needs.

Our Core Services

We built our rental catalog around the way real events actually unfold — not just a list of boxes to check. Every package can be scaled up or down depending on your guest count, venue, and budget.

Sound Equipment Rental

At the center of everything we do is professional-grade sound equipment rental. We stock powered and passive speakers, subwoofers, line arrays, digital mixing consoles, wireless and wired microphones, DI boxes, monitor wedges, and all the cabling and stands needed to tie a system together. Packages are sized for intimate gatherings of thirty guests as well as outdoor events with several thousand attendees.

A line-array sound system and truss rig set up for an outdoor event.

Audio Visual Equipment for Events

Beyond sound, we provide complete audio visual equipment for events of every format. This includes projectors and screens, LED video walls, live-streaming and recording setups, stage and uplighting, confidence monitors for presenters, and video switching for multi-camera productions. Corporate clients rely on us for keynote-ready AV packages, while wedding and social clients lean on us for uplighting, screens for slideshows, and clean, unobtrusive audio.

AV Equipment Rental with On-Site Support

Renting gear is only half the job — knowing how to run it is the other half. Our AV equipment rental packages can include a dedicated technician who arrives before doors open, handles setup and sound checks, monitors levels throughout the event, and manages teardown afterward. For clients who prefer to run their own system, we also offer drop-off and pickup service along with a pre-event walkthrough so your team feels confident on show day.

Event Types We Serve

- Weddings and private celebrations
- Corporate meetings, conferences, and product launches
- Concerts, festivals, and outdoor community events
- Nonprofit galas and fundraising dinners
- Panel discussions, town halls, and awards ceremonies
- Houses of worship and recurring community programs

Soft uplighting and floral installations at a wedding reception we supported.

How Our Rental Process Works

1. Tell Us About Your Event

Share your event date, venue, guest count, and general goals for sound and visuals. We ask a few quick questions about the room or outdoor space so we can recommend gear that actually fits the environment.

2. Get a Custom Equipment Package

We put together a recommended package of sound and AV equipment along with clear pricing. Packages are flexible — add a wireless mic, remove a speaker, or scale up for a larger crowd at any point before your event.

3. Delivery, Setup, and Testing

Our team delivers the equipment, sets it up according to your venue's layout, and runs a full sound check before your event begins. Cables are taped down, levels are set, and backup gear is on standby.

4. Live Event Support

If you've booked a technician, they stay on-site to manage the system throughout the event, adjusting levels, swapping microphones between speakers, and troubleshooting in real time so you never have to think about the technical side.

5. Breakdown and Pickup

Once your event wraps up, we handle teardown and equipment pickup, so you and your guests can focus on closing out the night instead of packing gear.

Why Event Planners Choose San Francisco Sound Rentals

Local Bay Area Expertise	We know San Francisco's venues, load-in restrictions, and outdoor permitting requirements, which means fewer surprises on event day.
Well-Maintained, Modern Equipment	Every speaker, mixer, and microphone is tested and maintained between rentals so you get consistent, professional-quality sound.
Flexible Packages	From a single speaker and microphone for a small meeting to a full concert-grade system, our audio visual equipment for events scales to match your event.
Responsive Communication	We reply quickly, offer transparent pricing, and stay reachable in the days leading up to your event and on the day itself.
Experienced Technicians	Our on-site staff have run sound and AV for events across every format, so your event is in capable hands from setup to strike.

Equipment Snapshot

A sample of the sound equipment rental and AV equipment rental inventory we regularly provide for events across San Francisco and the greater Bay Area:

Category	Examples
Sound	Powered speakers, subwoofers, line arrays, wireless & wired microphones, digital mixers, DI boxes, monitor wedges
Visual	Projectors, screens, LED video walls, confidence monitors, live-stream camera kits
Lighting	Uplighting, stage wash lighting, pin spots, moving-head fixtures
Support Gear	Truss and rigging, speaker stands, cable ramps, power distribution, backup units

Let's Plan Your Event Sound

Great audio and visuals are felt more than they are noticed — when the sound is clear, the screens are crisp, and everything simply works, guests remember the moment, not the microphone feedback. That is the standard we hold ourselves to on every booking.

If you are planning an event in San Francisco and need sound equipment rental, audio visual equipment for events, or full-service AV equipment rental with a technician on site, we would love to hear about it. Share your event details and we will put together a package built around your venue, your guest count, and your goals for the day.
